

## UTCTF 2021 Forensics – SHIFT by g0dd42d (Not The PPP)

### SHIFT Challenge

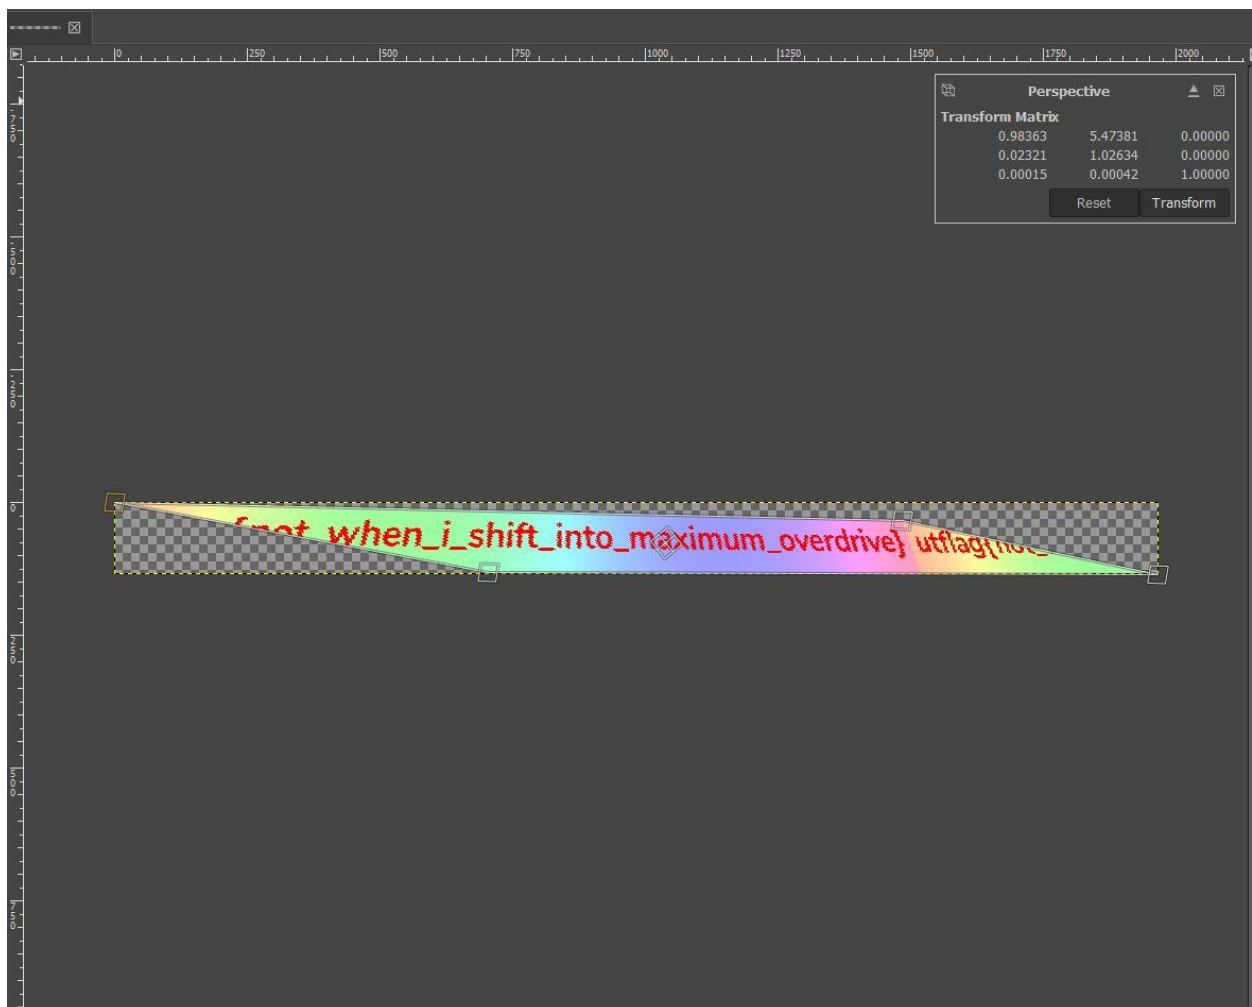

We are provided the following text and image attachment.

“I just tried to download this flag, but it looks like the image got messed up in transit...”

It is obvious the image has been shifted. Looking very closely, I can even make out some of the characters.

I open the image in GIMP. Using the Perspective tool (Tools > Transform Tools > Perspective), I adjust the image to read the flag.

Done!
